**Marbella International  
Plastic Surgery Summer School**

**September 5<sup>th</sup> - 7<sup>th</sup>**

We are pleased to announce the

# 7th International Plastic Surgery Summer School in Marbella!

After now already 6 successful editions, we are again looking forward to sharing knowledge with our colleagues from all over the world again. MIPSS has developed into an renown international event where Plastic Surgeons from all over the world share their honest experiences, discuss pearls and pitfalls of new techniques and contribute selected presentations within their field of expertise.

The 2023 edition was our biggest meeting so far and more than 130 attendees from all over the world coming to Marbella ensured us that our concept is very well received.

The meeting consists of two and a half-days of live-surgeries and in depth presentations in 8 scientific panels, allowing and specifically aiming for a direct and on-going exchange between faculty and attendees.

To ensure the workshop character of the meeting allowing for exchange and discussion, places are limited to 170 participants.

This year's scientific program will again boast an impressive array of internationally recognized speakers covering a wide range of Plastic, Aesthetic and Transgender Surgery procedures as well as a non-surgical treatments, practice management, optimization and marketing.
